

LE202: Basic Electrical Engineering Design II

Instructor: Songyot Nakariyakul, Supachai Vorapojpisut

Prerequisite: LE201

Course description:

Laboratory work and design projects on basic electronic circuits, digital systems, and electrical machines.

Course topics

Digital Circuit Lab (Songyot Nakariyakul) -- Room 508

Website: <http://songyot.ece.engr.tu.ac.th/LE202/>

Lab 1	Introduction to Logisim and digital board
Lab 2	Magnitude comparator
Lab 3	7-segment display
Lab 4	Flip-flops and synchronous sequential circuits
Lab 5	Counter

Signal Processing Lab (Supachai Vorapojpisut) -- Room 204-5

Digital Circuit Lab

Software: We will use Logisim (<http://www.cburch.com/logisim/index.html>) to simulate circuits in this lab. Logisim is a freeware and it is easy to use.
